Allowable Subject Matter

1. Claims 1-14 are allowed.

The following is the statement of reasons for the indication of allowable subject matter: The prior art disclosed by the applicant and cited by the Examiner fail to teach or suggest, alone or in combination, a high availability system and method comprising a first and second peripheral that share a bus and a controller also being connected to the bus such that the controller provides power to the first peripheral and second peripheral with the ability to restart the power-up sequence and skip the power-up of the first peripheral device if the first peripheral device was identified as being locked up, e.g., the identifier of the first peripheral device is not stored. Locking up the bus here refers to a bus being completely disabled and no amount of wait time can remedy the lock up of the bus.
